# Dagm Ayalew

## Mobile App Developer

Addis Ababa, Ethiopia

+251988280976 | [dagmayalew489@gmail.com](mailto:dagmayalew489@gmail.com) | <http://dagi-portfolio-terminal-1uaa.vercel.app>

## PROFESSIONAL SUMMARY

Software Engineer with 2 years of React Native experience, building production fintech and e-commerce apps serving 150+ daily users. Specializes in secure authentication, API integration, and performance optimization. Passionate about clean architecture and smooth mobile UX.

## WORK EXPERIENCE

### Mobile Application Developer | Eagle Lion System Technologies

*Feb 2026 – Present | Addis Ababa, Ethiopia*

- Implemented secure token-based authentication and local data storage, supporting 150+ daily active users and reducing session-related bugs by ~40%.
- Integrated 8+ financial APIs, enabling real-time transaction processing and reducing data sync latency by 30%.
- Built silent token refresh and local queue retry mechanisms to handle session expiry during long transactions.
- Collaborated with backend teams to define API contracts and optimize system stability.

### Full Stack Developer | TBC Technologies

*Mar 2025 – Feb 2026 | Addis Ababa, Ethiopia*

- Resolved 12+ critical production bugs, reducing crash rates by 25% and improving user retention
- Integrated REST APIs with retry logic and error boundaries, cutting API call failures by ~20%
- Participated in Agile workflows using Git, code reviews, and pull requests

### Frontend Developer | TBC Technologies

*Jun 2024 – Feb 2025 | Addis Ababa, Ethiopia*

- Developed responsive frontend features with React and Next.js, ensuring UI/UX consistency.

- 
- Handled data fetching and global state management by integrating frontend components with backend APIs.
  - Worked in a collaborative team environment using daily stand-ups and branching workflows.

## SELECTED PROJECTS

### Enterprise Banking & Microfinance Super Apps

#### **Dashen Bank, CBE, Choice Micro Finance**

React Native, TypeScript, REST APIs

Delivered features for 3 major Ethiopian financial applications serving millions of customers:

- Implemented secure API integrations and authentication flows for financial transactions
- Standardized UI components and navigation patterns across multiple banking platforms
- Optimized loading states and error handling for critical financial operations

### EthioPost Agent Banking Mobile App

React Native, TypeScript, Zustand, REST APIs

Built secure agent banking features including OTP/PIN login, wallet flows, transaction APIs, silent token refresh, and local retry handling to improve transaction reliability.

### Order Ethiopia – E-Commerce Mobile App

React Native, TypeScript, Zustand, REST APIs

Developed core e-commerce mobile features including product cards, cart, checkout, search, profile screens, location selection, reusable UI components, and smooth refresh/header animations.

### Worklance – Job Aggregation Platform

React Native, Web, Telegram Mini App, Backend

Built a cross-platform job platform with mobile screens, authentication flows, API integration, session handling, and scalable data flow across mobile, web, and Telegram.

### Exam Time – Mobile App & Admin Portal

React Native, Realm, RTK Query, React Admin Portal

Improved production stability by fixing mobile crashes, Realm offline-data issues, navigation bugs, and admin portal state-management problems.

## TECHNICAL SKILLS

- **Mobile (Primary) :-** React Native, TypeScript, Flutter, Kotlin, Swift
- **State Management :-** Zustand, RTK Query, Realm, AsyncStorage

- 
- **Frontend :-** React, Next.js, JavaScript
  - **Backend :-** REST APIs, JWT, NestJS, Firebase, Firestore, MySQL
  - **Tools :-** Git, Postman, Xcode, Android Studio, VS Code

## EDUCATION

### **Bachelor of Science in Computer Science**

Unity University, Addis Ababa (Gerji Campus) | Graduated 2025

## LANGUAGES

English (Professional), Amharic (Native)
